

Docket 61340  
Serial No. 10/811,269

PATENT APPLICATION

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the U.S. Patent Application of )  
MATTHEW B. PORTER )  
Serial No.10/811,269 ) Group Art Unit 1731  
Filed March 26, 2004 )  
For: RETRACTABLE CAR COVER )

ASSISTANT COMMISSIONER OF PATENTS  
OFFICE OF INITIAL PATENT EXAMINATION'S CUSTOMER SERVICE  
WASHINGTON D.C. 20231

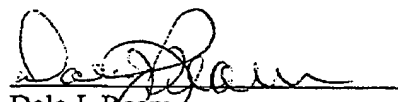

REQUEST FOR CORRECTION OF FILING RECEIPT

The filing receipt received from the U.S. Patent and Trademark Office incorrectly identifies the Total Claims as "13" and the Independent Claims as "2." The Total Claims should be identified as "19" and the Independent Claims as "3."

A copy of the filing receipt with the changes noted thereon is enclosed along with a copy of the Claims for the above referenced patent application.

Applicant requests that a corrected filing receipt be issued.

Respectfully submitted,

  
Dale J. Ream  
Registration No. 45,798  
Attorney for Applicant

Date: July 1, 2004

Harshaw Research Incorporated

## FILING RECEIPT

\*OC00000012895808\*

Date Mailed: 06/08/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

## Title

Retractable car cover

## Preliminary Class

065

## CLAIMS

- 1           1.     A retractable vehicle cover apparatus for selectively covering a vehicle  
2     having sides, the apparatus comprising:  
3           an elongated housing presenting side wall structure and having an elongated  
4           aperture presenting a length defined through the wall structure;  
5           an axle disposed within the housing for rotational movement about a central axis;  
6           and  
7           an elongated cover having a first end and a second end coupled with the axle, the  
8           cover being selectively movable between an extended position where a  
9           substantial portion of the cover extends from the housing and a retracted  
10          position where the cover is substantially wrapped around the axle;  
11          wherein the cover includes opposed edges defining a width, the cover including  
12          adjustment means for permitting selective adjustment of the width of the  
13          cover between a rest condition where the width of the cover is substantially  
14          the same as the length of the aperture and an expanded condition where the  
15          cover is expanded to cover a portion of the sides of the vehicle.
- 1           2.     The retractable cover apparatus as set forth in claim 1, wherein the  
2     adjustment means includes an elastic backing member having a rest width substantially  
3     the same as the length of the aperture.
- 1           3.     The retractable cover apparatus as set forth in claim 2, wherein the cover  
2     further includes a plurality of elongated, aligned cover strips extending substantially from  
3     the first end to the second end of the cover, the cover strips being mated to the backing  
4     member.
- 1           4.     The retractable cover apparatus as set forth in claim 3, wherein the cover  
2     strips are constructed from a flexible, generally water resilient material.

1           5.     The retractable cover apparatus as set forth in claim 3, wherein the cover  
2 strips are constructed from generally flexible, synthetic resin material.

1           6.     The retractable cover apparatus as set forth in claim 3, wherein the cover  
2 further includes a plurality of padding strips mated to the backing member.

1           7.     The retractable cover apparatus as set forth in claim 3, wherein the cover  
2 further includes a pair of straps, each strap being coupled with one of the edges of the  
3 cover for retaining the cover in the expanded condition.

1           8     The retractable cover apparatus as set forth in claim 1, wherein the cover  
2 further includes an exterior cover member extending substantially from the first end to the  
3 second end of the cover, and between the edges of the cover.

1           9.     A retractable vehicle cover apparatus comprising:  
2           an elongated housing presenting side wall structure and having an elongated  
3           aperture presenting a length defined through the wall structure;  
4           an axle disposed within the housing for rotational movement about a central axis;  
5           and  
6           an elongated cover having a first end and a second end coupled with the axle, the  
7           cover being selectively movable between an extended position where a  
8           substantial portion of the cover extends from the housing and a retracted  
9           position where the cover is substantially wrapped around the axle,  
10          the cover including a plurality of elongated, aligned padding strips extending  
11          substantially from the first end to the second end, and an elastic member  
12          mated to the strips for permitting selective expansion of the cover toward  
13          an expanded condition for covering the vehicle when the cover is in the  
14          extended position.

1           10.    The retractable cover apparatus as set forth in claim 9, wherein the elastic  
2           backing member presents a rest width substantially the same as the length of the aperture,  
3           and the backing member extends substantially from the first end to the second end of the  
4           cover.

1           11.    The retractable cover apparatus as set forth in claim 9, wherein the cover  
2           further includes a plurality of elongated, aligned cover strips extending substantially from  
3           the first end to the second end of the cover, the cover strips being mated to the backing  
4           member.

1           12.    The retractable cover apparatus as set forth in claim 9, wherein the cover  
2           strips are constructed from a generally flexible, synthetic resin material.

- 1           13.    The retractable cover apparatus as set forth in claim 11, wherein the cover
- 2    further includes a pair of straps, each strap being coupled with one of the edges of the
- 3    cover for retaining the cover in the expanded condition.

1           14.    A retractable vehicle cover apparatus for selectively covering a vehicle  
2   having sides, the apparatus comprising:  
3           an elongated housing presenting side wall structure and having an elongated  
4           aperture having a length defined through the wall structure;  
5           an axle disposed within the housing for rotational movement about a central axis;  
6           and  
7           an elongated cover having a first end and a second end coupled with the axle, the  
8           cover being selectively movable between an extended position where a  
9           substantial portion of the cover extends from the housing and a retracted  
10          position where the cover is substantially wrapped around the axle,  
11          the cover presenting a pair of opposed edges, and including an elastic member  
12          extending substantially between the edges of the cover, the elastic member  
13          biasing the cover toward a rest width substantially the same as the length  
14          of the aperture and an expanded width where the cover expands to cover at  
15          least a portion of the sides of the vehicle.

1           15.    The retractable cover apparatus as set forth in claim 14, wherein the cover  
2   further includes an exterior cover member extending substantially from the first end to the  
3   second end of the cover, and between the edges of the cover.

1           16.    The retractable cover apparatus as set forth in claim 14, wherein the cover  
2   includes a plurality of elastic members.

1           17.    The retractable cover apparatus as set forth in claim 14, wherein the elastic  
2   member extends substantially from the first end to the second end of the cover, the cover  
3   further including a plurality of elongated, aligned cover strips constructed from a flexible  
4   synthetic resin material.

1           18.    The retractable cover apparatus as set forth in claim 17, wherein the cover  
2    further includes a strap coupled with each of the edges of the cover for retaining the cover  
3    in the expanded condition.

1           19.    The retractable cover apparatus as set forth in claim 14, wherein the cover  
2    further includes a plurality of padding strips.
